

# Epidemic and Pandemic Policy (Covid 19) revised 4<sup>th</sup> March 2022

## Statement of Intent

Blackberry Lane Pre-school and Nursery intend to use this policy to provide precautionary measures to minimise transmission risks of disease in the setting during an epidemic or pandemic. It also states ideas for continuity of business if allowed.

Legislation and leading authorities which have guided and influenced this policy are: Coronavirus Act 2020, Health and Safety at Work Act (1974), Health and Safety Executive (HSE), Government Briefings, Public Health England (PHE) and World Health Organisation (WHO). Advice from but not limited to, The Secretary of State, The Chief Medical Officer, Local Authority (LA) and Department for Education (DfE). The policy also has regard to Ofsted and Early Years Foundation Stage (EYFS) guidance where appropriate.

## Aim of Policy

This Policy defines and assists the operating arrangements in place within the pre-school and nursery that assures compliance to the Government and leading bodies requirements with relation to the outbreak of a pandemic such as Covid19. This information builds upon our current procedures for areas such as Safeguarding, Child Protection and Equality and Diversity, however new practices may emerge as the situation continues. The policy and considerations may evolve and be built upon as the situation deepens and new precautionary measures have been introduced and practices have been reflected upon.

## Method

As early years providers we ensure to offer a continuum of very high standards of practice of childcare and education. The fundamental principles to be outlined in this policy are set out to ensure physical distancing is enabled and implement good hygiene practices as well as avoiding or minimising contact with infected children and adults or anyone displaying symptoms. It states the protective measures put in place for children, parents and staff as best as possible to ensure the risk of transmission is reduced. We will continue to follow our other policies as long as they do not conflict with this policy and be guided by the EYFS as best as we can. The main areas we will be considering are:

- Minimising contact with individuals who are unwell.
- Maintaining personal and respiratory hygiene (handwashing, 'catch it, kill it, bin it').
- Ensuring cleanliness of the environment (especially frequently touched surfaces).
- Minimising general contact and mixing.
- The use of Protective and Personal Equipment (PPE).
- Testing.

## Focus/ Areas of Consideration / Recommendations

### Children

#### *Attendance*

- Only children who are symptom free or have completed the required isolation period should attend the setting.
- The use of communal internal spaces should be restricted as much as possible and outdoor spaces should be utilised as much as possible to minimise social contact.
- Sunscreen should be applied by the parents / carers before the child arrives at the preschool. T shirts covering shoulders and leggings would be preferable to minimise how much top up of sunscreen they will do.

#### *Wellbeing and education*

- Children should be supported in age-appropriate ways to understand the steps they can take to keep themselves safe including regular hand washing, coughing into their elbow, using a tissue and adopting a 'catch it, kill it, bin it' regime.
- Children should be supported to understand the changes and challenges they may be encountering and staff need to ensure they are aware of children's attachments and their need for emotional support.

- EYFS framework will continue to be delivered through play and adult led activities.

## **Workforce**

### *Attendance*

- Staff should only attend preschool if they are symptom free, have completed the required isolation period or achieved a negative test result.
- All staff and their household are eligible for testing if they display symptoms.
- Staff hours, days they work, and length of day may change in order to meet childcare demands and considerations within this policy.

### *Social distancing/ grouping /safety*

- Staff will complete a risk assessment before opening.
- Staff will conduct 2 Lateral Flow tests per week and only attend work if negative. This will apply until the 24<sup>th</sup> of March 22.
- Staff to be informed of measures in place and sign a disclaimer to state they have read and understood the preschool policies and procedures.
- Emergency revisions to the EYFS may have been implemented which provides some flexibility on ratios and qualifications to make this feasible.
- Staff have been advised by the government not to wear PPE such as facemasks during their day but should continue to wear PPE at the usual times such as intimate care. When supporting an ill child, a face mask and visor should also be worn if a 2-metre distance cannot be maintained.
- After dealing with a child who displays symptoms the staff member should continue to wear PPE and clean the affected area with disinfectant.
- All PPE should be removed and disposed of following current government guidelines, the staff member should wash their hands for at least 20 seconds.
- The staff member who supported the child does not need to go home unless they are developing symptoms themselves, however, they will be offered the opportunity to go home if they want to.
- Social distancing will continue to be maintained during breaks. This may be achieved through a range of strategies including the staggering of breaks and subdivision of spaces allocated to team breaks where possible.
- Staff will be responsible to ensure appropriate cleaning takes place and enough ventilation is in the room, such as opening windows. If doors are open, ensure the safety of the children is maintained.
- Staff members should avoid physical contact with each other including handshakes, hugs etc.

### *Training*

- Where possible, meetings and training sessions should be conducted through virtual conferencing.
- All staff members must receive appropriate instruction and training in infection control and the standard operating procedure and risk assessments within which they will be operating.
- Online training may be available to allow their training levels to be maintained if appropriate.

## **Parents**

### *Dropping off and picking up times*

- Only parents who are symptom free and or have completed the required isolation periods will be able to drop off or collect their child.
- Arrange drop off and pick up at the entrances to avoid parents entering them unnecessarily.
- When parents are waiting to drop off or collect their child, care should be taken to avoid close contact if the area becomes crowded.
- Consider allowing some parents to enter the settings for the purpose of a settling in session if not doing so would cause a child distress, this could take place in the outdoor environment. The provider should consider measures to minimise contact between the parent and other children and staff members.
- If the child is too distressed perhaps a delayed start to their preschool and nursery entry may be preferred.

### *Communications*

- Parents should receive clear communication regarding the role they play in the safe operating procedure and all measures being taken to ensure the safety of their children and themselves.
- Parents should inform preschool or nursery of their circumstances and if they plan to keep their child away, this helps the settings to conform to our safeguarding policy.

### **Visitors**

- Attendance to the settings should be restricted to only children and staff as far as practically possible, however visitors from outside agencies such as Speech and Language/Occupational therapists, essential building maintenance etc. will be permitted so long as they have completed a visitor's risk assessment and are symptom free.
- Where essential visits are required, these should be made outside of the usual preschool operational hours where possible.

### **Hygiene and Health & Safety**

#### *Hand Washing*

- All children and staff must wash their hands upon arrival at the preschool and nursery for at least 20 seconds.
- Children and staff members should be encouraged to wash their hands frequently, this includes before and after eating food, after visiting the toilet or playing outdoors, after sneezing, blowing their nose or coughing into their hand and dealing with unwell people.
- Bodily fluid spills should follow the correct procedures as normal.

#### *Cleaning*

- An enhanced cleaning schedule must be implemented that includes furniture, surfaces and children's toys and equipment and all staff are responsible in their area of work.
- Communal area, touch points and hand washing facilities must be cleaned and sanitised regularly and cleaned thoroughly every night.
- A deep clean may be needed after a child has become ill in the area they were waiting.
- An air purifier has been installed in both settings and will be used daily.

#### *Waste disposal*

- All waste must be disposed of in a hygienic and safe manner following government guidelines.
- Tissues must be immediately disposed of and placed in a bin with a bag.
- Bodily fluids must be double bagged and disposed of in the designated sanitary bin.

#### *Laundry*

- All items within the setting requiring laundering must be washed in line with NHS laundry guidelines.
- Items such as towels, flannels and bedding must not be shared by children.

#### *Risk assessment*

- The setting and all activities should be risk assessed before opening or going ahead to address the risks from any virus and due consideration given to any adaptations to usual practice. Sensible measures should be put in place and policies and procedures followed.
- Cut down on the available resources in the preschool or nursery.
- Remove anything which cannot be easily wiped down or washed at the end of the day.
- Baking activities and malleable activities i.e., play dough will recommence under adult supervision and hand washing procedures adhered to.

#### *PPE*

- Government guidance is that PPE is not required for general use in early years settings to protect against COVID- 19 transmission.
- PPE should continue to be worn and disposed of as normal for nappy changing, one to one care and the administration of first aid.
- If a child shows symptoms, staff should wear a face mask, visor, disposable gloves and apron if a 2-metre distance cannot be maintained at all times. PPE should be disposed of following government guidelines

#### *Premises Building*

- Keep windows open where possible to ensure good levels of ventilation. If doors are opened ensure the children safety is maintained with locked gates.

#### *Resources*

- Children should not be permitted to bring items from home into the setting unless absolutely essential for their wellbeing. Anything that is brought in from home should remain in the child's bag on their peg.
- All resources required for play and learning experiences of children should be regularly washed and/or sterilised. Any resources which are difficult to clean should be removed.
- Equipment used by staff such as stationary, tablets etc. should be cleaned regularly.

#### *Supplies Procurement & monitoring*

- The preschool and nursery should ensure an adequate supply of essential supplies and contingency plans such as additional suppliers are in place to minimise the impact of any shortages of supplies.
- The preschool and nursery will not be able to operate without essential supplies required for ensuring infection control.
- A monitoring system for the usage of PPE is essential to ensure that a supply of stock is available to all who require it as and when required to meet the operational needs of the setting. When stocks are low, other options may be considered, such as the use of washable tabards etc.

#### *Responding to a suspected case*

- In the event of a child developing suspected coronavirus symptoms whilst attending the setting, they should be collected as soon as possible and isolate at home until they are well and have no symptoms.
- Whilst waiting for the child to be collected they should be isolated from others in a previously identified room or area. If possible, a window should be opened for ventilation.
- The staff member responsible for the child during this time should be a familiar staff member. The staff member will wear suitable PPE i.e., face mask, visor, disposable gloves, and apron.
- The area should be thoroughly cleaned immediately if the area cannot be left unvisited, and if the area can be left unvisited then cleaned after 72 hours.
- The person responsible for cleaning ideally should be the person dealing with the unwell child and should continue to wear their PPE. This should then be disposed of according to current government guidelines.
- In the event of a staff member developing suspected coronavirus symptoms whilst working at the setting, they should return home immediately and isolate at home for 5 days until they feel well and have no symptoms.

#### *Responding to a confirmed case for children*

- All families will be notified of any case of coronavirus.
- *Children with symptoms*  
Children with key symptoms of Covid 19 should not attend the settings given the potential risk to others. The Manager of the setting may take the decision to refuse a child if, in their reasonable judgement, it is necessary to protect the other children and staff at the setting from possible infection.  
If a child has symptoms, we ask that they isolate for 5 days and may return to the setting if they have no symptoms. Our usual policy regarding children being off sick and fees will apply.

#### *Children in contact with a positive case in the household.*

If someone in your household has tested positive, your child may continue to attend the setting if they have no symptoms and feel well. In line with our usual policy, if a child appears unwell, we will contact the parents to take their child home.

- *Children in contact with a positive case at the setting.*  
We inform all families if a child or member of staff has tested positive for coronavirus. If your child is well and showing no coronavirus symptoms, they may continue to attend the setting as normal. If a child has been in very close contact with the infected person, we will advise parents individually.
- The setting will be cleaned thoroughly.

### *Responding to a confirmed case for staff*

- *Staff with symptoms.*

Staff with symptoms of Covid 19 should not attend the settings given the potential risk to others. The Manager of the setting may take the decision to ask a member of staff to remain at home or take a lateral flow test if, in their reasonable judgement, it is necessary to protect the other children and staff at the setting from possible infection.

If a member of staff develops any of the coronavirus symptoms, they should isolate immediately for 5 days. They may return to work if they have no symptoms and feel well.

- *Staff with contact with a positive case in the household.*

If a member of staff is part of a household which has tested positive, they may continue to work if they feel well and have no symptoms. However, they must have a negative lateral flow test result every day for 5 days before coming to work.

- *Staff with a positive lateral flow test result.*

If a member of staff has tested positive using a lateral flow test, they should isolate immediately for 5 days. They may return to work if they have no symptoms and feel well.

- *Staff with contact with a positive case at pre-school/nursery.*

If a member of the staff has tested positive, any members of staff who have been in contact with the infected person can continue to come to work if they feel well and have no symptoms.

### **Monitoring of this policy**

*This policy will be reviewed regularly by the setting manager/director, new government legislation and policies will be incorporated appropriately as and when required or informed. Any breach of this policy may result in repercussions and further action taken.*
